Karl Marx – Concrete Analysis

By Karl Marx (1871, after Paris Commune, in Paris, in the Aleatory Winter)

Introduction
By David Harvey

A flourish of works just published also by Lenin and Trotsky on recent and Soviet days. I mean with Marx in line with the Blanquists as he means, Peter Hallward opts for Blanqui himself in fact – a bourgeois leader of poetic quality who then is always political and lanky and murderously radical.

I mean though Marx is better understood to be arguing that insurrection is not the only question, its development into parties is better.

He means be a parliament goer and also a daily politician of parliament type.

If living separately be of some such official subject.

Politicians always live I hear in the argument in political science from Saroj Giri – as social structure which is finally working class and peasant class and middle class and commercial classes and capitalist class as it were and the leader and his vertical ideology of say in Sirohi, Hegel and French structuralism, with also Heidegger and German Idealism this then organizes a alignment and compact logic of in fact a vertical and successful leader.

Marx should be read in this fashion – calling for just that.

In Lenin’s case this alignment is insurrectional and then an economic failure, he is the absolute but also just the inventor of modern Lenin style politics, it should be read also as in need of Gramsci and Hegemony in parliaments in democratic senses perhaps.

Table of Contents

I. Types of Political Leaderships – Liberal or Leftist or Communist type
II. A Communist as Keen Debater.
III. A Leader as Concrete Analyst
IV. A Concrete Analysis is then efficient
V. Practical Talking

I. Concrete Analysis Needed, Can Militants Heed and be Concrete, not Hegelian Blanquists

I mean we need a concrete analysis, I mean it must be concrete and political. I also mean a programme, which is also a contingent line and a line contingent which will win, contingency will win then.

II. Failure in My Own Praxis or Practice of Concrete Analysis

I mean the line goes Paris Commune, but I go party politics and Gotha Programme for a whole Party politics.

This can be a failure.

I mean shoot a contingent line. I mean in daily life when ill, also shoot a correct contingent line – spontaneity is correct, Blanquists say. But I also add militancy and I add the contingent line clinch victory by a lot of style. I also add theses after theses, call this aleatory lines contingent upon a delivery.

Engels edit this.
